Brief

Integrate with the REST Countries API to pull country data and display it like in the designs.

- See all countries from the API on the homepage
- Search for a country using an `input` field
- Filter countries by region
- Click on a country to see more detailed information on a separate page
- Click through to the border countries on the detail page
- Toggle the color scheme between light and dark mode *(optional)*
- Flexbox and Grid for layout
- You can use any Angular or React framework/library on the front-end

- Java with spring boot in back end
